BIG WHEEL MACHINERY MOVING DOLLIES

**MAKE THE BEST
MOVE POSSIBLE**

**DESIGNED FOR USE WITH LIFT
SYSTEMS' RUNWAY TRACK**

RIGGING GEAR SALES INC. combines quality and experience to manufacture specialized machinery moving dollies.

Our approach to machinery moving dollies allows you to move your heaviest loads easily, efficiently, and professionally.

Designed to prevent floor damage and to rarely require other floor protection, the large steel wheels and antifriction bearings enable you to move loads without causing surface or structural damage to concrete floors.

BIG WHEEL DOLLY SPECIFICATIONS

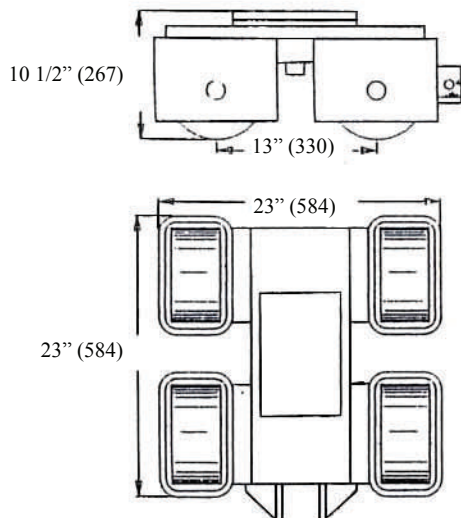

BIG WHEEL DOLLY UNITS can be used in many different configurations, allowing for the best move possible in any circumstance. The special steel wheels minimize the possibility of damaging floor surfaces and, at the same time, make it extremely easy to move pieces of all sizes through plants and warehouses.

Quad-Roll Dolly

- Quad-roll units are built in capacities of 50 (45) ton each.
- Quad-roll units can be used in conjunction with the 50 (45) ton Steering Dolly units for heavier loads.

Steering Dolly Units

- Steering units are built in capacities of 50 (45) ton each.
- Steering units are designed with a swivel plate, 4' (1219) handle for steering, and a special bearing to insure easy and smooth turns.
- Steel wheels with special anti-friction bearings insure easy movement.
- Units require little or no maintenance.
- No channel, no steel plates.

NOTE: Specifications are provided in U.S. and (Metric) millimeters. All equipment dimensions, designs, specifications, calculations, etc., as described above, are subject to change at manufacturer's discretion at any time without notice. Data herein is for informational purposes only and will not be construed to guarantee suitability of the equipment for any particular purpose of the equipment.
